Integrate Art into Every Subject

at Ashland High School!

The world's art is a rich resource for teachers to enhance their curriculums. Imagine a History class studying ancient Greece, with walls covered in images of ceramics and sculpture from the period; a Math class with images of engineering and architectural feats to aspire to; an English class exploring tone and atmosphere by looking at visual examples by Pablo Picasso, Francisco Goya, Caravaggio and others. The aim of the *Art Appreciation and Integration Poster Library* is to provide teachers with a comprehensive collection of large, high quality art images to hang on their walls to augment lessons and units.
